

SWITCHGEARS

a). FOR SCHNEIDER –

Pristine in partnership with Schneider Electric (I) Pvt. Ltd. has set up the manufacturing facility in Pune for manufacturing of 12 KV/ 24 KV/ 36 KV metal clad switchgear panel. In this arrangement M/s Schneider Electric (I) Pvt. Ltd. is supplying VCB/SF6 Circuit Breakers trucks and the Pristine is manufacturing tailor made panel suitable to customer requirements.

Pristine started the manufacturing of panels in Pune in year 2008 with total shop floor area of 70,000 Sq ft. Pristine has a regional marketing offices at Delhi, Mumbai, Pune, Bangalore, Hyderabad, Ahmadabad and Baroda, staff of more than 125 people & a team of experts in the field of MV switchgear.

Pristine has supplied more than 1500 panels to various sectors of industries such as Building, Industry, Utilities, and Infrastructure projects throughout India & abroad. Pristine Switchgears (I) Pvt. Ltd. is the Licensee Partner of Schneider Electric Industries SAS for the local production and sale of NEX 17.5 switchboard. Pristine Switchgears has two manufacturing unit in Pune, India. Pristine Switchgears (I) Pvt. Ltd. has full-fledged facilities to manufacture more than 1500 panels per year.

b). FOR ABB -

Our Group Company is closely associated with ABB for the manufacture of Medium Voltage Switchgear Panels. We provide wide range of Medium Voltage Switchgear from 3.3KV to 33KV. Today we have an annual production capacity of more than 1000 MV Switchgear Panels.

Our Panels are designed to facilitate bulk production on CNC machines which has not only enhanced our capability to deliver multi-panel switchboards in a very short time, but also improved overall aesthetics and ease of installation at sites.

Panels are made of CRCA sheets & GI Sheets and will have surface finish done by epoxy based powder coating after subjecting to seven tank process.

In-house testing facilities for carrying out all the routine tests in line with the latest IEC & IS standards have ensured total customer satisfaction when it comes to quality standards.

We provide a range of services for Switchgear Panels right from Supply, Installation and Commissioning of Panels to providing one to one retrofitting solutions against the old existing panels or breakers as required by the customers.
